

jasmine statements

describe(*label*, function(){ ... })
| group tests together

it(*label*, function(){ ... })
| label individual test

expect(*actual*)
| used to compare against expected values

beforeEach(function(){ ... })
| run prior to each *it* in the *describe*

afterEach(function(){ ... })
| run after each *it* in the *describe*

xdescribe(*label*, function(){ ... })
| skip section (*note the x*)

xit(*label*, function(){ ... })
| skip test (*note the x*)

jasmine matchers

to(Not)Be(*null | true | false*)

to(Not)Equal(*value*)

to(Not)Match(*regex | string*)

toBeDefined()

toBeUndefined()

toBeNull()

toBeTruthy()

toBeFalsy()

to(Not)Contain(*string*)

toBeLessThan(*number*)

toBeGreaterThan(*number*)

toBeNaN()

toBeCloseTo(*number, precision*)

toThrow()

Matchers can be chained with a **not** between the actual and assertion.

jasmine doubles/spies

spyOn(*obj, method_string*)

obj.stubbed.calls
| *array*

obj.stubbed.mostRecentCall
| *call object*

obj.stubbed.calls[0].args
| *array*

toHaveBeenCalled()

toHaveBeenCalledWith(*array*)

andCallThrough()
| spy and delegate to real object

andReturn(*value*)

andCallFake(function(){ ... })

jasmine.createSpy(*id*)

jasmine.createSpyObj(*baseName, methods[]*)

jasmine.any(*constructor*)
